# Square Pilot Indicating Light AD26B-22HMS

Part NO: AD26B-22HMS

Application and main technical parameters:

1) Operating Diameter: 22mm

2) Brightness: ≥110cd/m2 , super bright LED SMD chips

3) Emitting Color: Red (R), green (G), yellow (Y) , white (W), blue (B)

4) **Measuring Frequency range :0-100Hz**

5) **Operating voltage: AC300-600V**

6) Insulation resistance: More than 20mΩ

7) Frequency: 50/60Hz

8) Operational temperature: -20℃~+55℃

9) Operational humidity: 45% to 90%

10) Pollution grade: 3

11) Protection grade: IP65

12) Super pure color chips, Top-class quality potentiometer

13) 100% Passed 48hours high-low temperature life time testing before shipping

14) Certificate: CE
