

Versatile QT modular tower lights.
Its the popular choice.

The QT50L and QT70L are modular, multi-functional LED tower lights designed for versatility and ease of use.

The outer dimension of QT50L is Ø50mm, while QT70L features a DIA of Ø70mm.

Both models offer a compact, effective solution as signaling tower lights.

They consist of interchangeable modules that can be customized to specific requirements, thus allowing for a high degree of flexibility via the lens, buzzer, ethernet cord, USB cord and Mounting brackets.

The tower light include the LED, base, and pole modules. No additional tools needed for assembly. The modular design ensures that all components can be freely arranged to suit the desired configuration, with the exception of the dial tone lever. A unique feature of the QT tower light series is the buzzer module, which is compatible with light modules via an innovative repositioning design, enabling seamless integration.

Choose from multiple mode types such as strobe, stimulated revolving, steady or flashing; with a flash rate range from between 60 to 80 flashes per minute ensuring clear visibility even in noisy environments. Additionally, the towers feature 15 selectable buzzer alarm tones, offering audible signaling options that can be tailored to user preference. Materials used in the construction include a polycarbonate lens, ABS cover, PC base modular, and Aluminium pole, providing both durability and functionality.

These tower lights are designed to operate in a wide range of environments, with an ambient temperature range of -30°C to +50°C. A protection rating of IP65, makes them suitable for both indoor and outdoor applications. Operating voltages are available in DC12V, 24V, and AC110V, 220V options.

For added functionality, the QT50L-BZ and QT70L-BZ versions come with a built-in buzzer, making them an all-in-one signaling solution.

Benefits include a customisable design to easily arrange interchangeable modules without additional tools, buzzer with light module compatability, high protection rating IP65, a wide operating temperature range and multiple operating voltages. All of this makes the QT tower lights a versatile popular choice over other options on the market.
